CO1-AT1_FODS

RegNO: 192426015
Name: Manish kumar
Course code: DSA0401

(1.) How can data science help identify students who may fail?

A. Data Science can analyse students attendance, marks, assignments and previous performance It can predict which students are at risk of failing so that teachers can provide early support

(3.) Which use of Data Science is applied in product recommendation?

A. Data Science is used for recommendation systems It analyse customers previous purchases and interests to suggest product they are likely to buy

(5.) How can Data Science support reducing customer loss?

A. Data Science can analyze customer behaviour and identify customers who may stop using a service The company can then offer suitable discounts or services to retain them

(7.) How can Data Science help a supermarket identify festival sales?

A. Data Science can analyze past sales data to find which product are sold more during festivals This helps the supermarket plan stock and promotions effectively

(9.) Give one use of Data Science in crop yield improving.

A. Data Science can analyze wether, Soil, and crop data to help farmers choose suitable crops and improve farming decisions, leading to better crop yield

(10) which facet of data is involved when a weather app updates temperature every minute?

A. The facet involved is velocity It refers to the speed at which data is generated, collected and updated

(13.) What type of data are customer comments on social media?

A. Customer comments are unstructured data because they are text - based and do not follow a fixed row and column format

(15.) which data quality issue is present in the hospital dataset?

A. The data set has data quality issues such as missing and inaccurate data missing age values represent incomplete data, while incorrect phone numbers represent inaccurate data

Reg No: 192426015

Which part of the Big Data ecosystem is used to store large files in Hadoop Distributed file system?

The Hadoop Distributed file system (HDFS) is used It stores large data sets across multiple computers in a distributed manner

which Big data ecosystem component is suitable for collecting live IOT sensor data?

Apache kafka is suitable for collecting and streaming live data from IOT sensors. It can handle large amounts of real-time data efficiently
